

SCHOOL & SCHOOL BOARD PARTNERSHIP PROPOSAL

School Board Review Package

Student Safe Driving Program
Ontario Secondary Schools

INDEPENDENT • ONTARIO-FOCUSED • REVIEW-READY

Prepared for school boards, secondary schools and authorized education partners.

Review status: proposal for institutional review and potential pilot.

GTestCanada is not a government agency and this document is not an endorsement or approval.

GTESTCANADA
Student Safe Driving Program

Executive Summary

GTestCanada is an independent Canadian online resource focused on Ontario G1 knowledge-test preparation. The Student Safe Driving Program is proposed as a simple, accessible resource that secondary-school students can use alongside existing school, family and official licensing resources.

The proposed partnership gives an authorized school a school-specific QR code or referral link. Students can access free preparation resources and may optionally purchase the G1 3-Day Pass. Qualifying purchases are attributed to the participating school through a secure referral process.

Student audience	Ontario secondary-school students preparing for the G1 knowledge test.
Free resources	G1 preparation, practice questions and road-sign learning resources.
Optional pass	CA\$3.75 for 72 hours of access to 300 practice questions.
School attribution	Unique school QR/link with server-verified referral attribution.
Payment	Stripe processes payments; GTestCanada does not store card details.

Review status

This package is a request for school-board review and pilot discussion. It does not represent Ministry of Education, MTO, DriveTest, school-board, government approval, accreditation, affiliation or endorsement.

Student Safe Driving Program

Program Design & Student Journey

The program is designed to complement—not replace—official Ontario licensing information, school-board policy, classroom instruction, or professional driver education.

- Student enters through an authorized school-specific QR code or referral link.
- Student provides a name for the local browser experience.
- Student can use free G1 preparation and practice resources.
- Student may optionally purchase the CA\$3.75 G1 3-Day Pass.
- A qualifying purchase is attributed to the school through server-verified referral data.

What students can access

Ontario-focused preparation

Content designed around Ontario G1 knowledge-test preparation.

Free practice

Students can begin with free preparation resources before any purchase.

300-question paid bank

The optional 3-Day Pass provides 72-hour access to 300 practice questions.

Road-sign learning

Dedicated practice resources support recognition and understanding of Ontario road signs.

Student Safe Driving Program

Student Privacy & Responsible Data Practices

The current school referral implementation uses a limited-data approach. The statements below describe the current implementation and should be considered alongside the school board's own privacy, legal, procurement and IT-security review.

Student name	Stored locally in the student's browser for the current school experience; not sent through the school referral session endpoint.
Session identifier	A randomly generated UUID is used for referral attribution.
Purchase attribution	Qualifying purchases may be associated with the participating school code and anonymous session identifier.
Payment information	Stripe processes payments. GTestCanada does not store payment-card details.
School visibility	The current system does not provide schools with a student-level list of visitors or purchasers.

Broader website technologies such as analytics, cookies and advertising are addressed in the GTestCanada Privacy Policy. Board reviewers should review the current policy and determine any additional requirements applicable to their students and environment.

Security & Referral Integrity

- Referral tokens are cryptographically signed and time-limited.
- The server verifies that a school exists and is active before issuing a referral token.
- Client-side changes to a school code do not determine purchase attribution.
- Referral tokens expire after 30 days.
- Failed, abandoned or cancelled payments are not treated as qualifying purchases.

Student Safe Driving Program

Proposed School-Board Pilot

A small pilot is recommended so the board can evaluate fit, privacy, usability and student value before considering wider participation.

01 Board review

Confirm privacy, IT/security, accessibility, procurement and communication requirements.

02 Pilot schools

Board selects approximately 3–5 secondary schools.

03 Approved distribution

School-specific QR codes/links are distributed through approved channels.

04 Voluntary use

Students choose whether to use the free resources or optional paid pass.

05 Feedback

Collect school/board feedback on usability, clarity and implementation.

06 Review

Board evaluates outcomes and decides whether any broader participation is appropriate.

Questions for Board Review

- Does the program fit existing student-success, road-safety or transition programming?
- What privacy, procurement, accessibility, IT-security or third-party service review is required?
- What student-facing notice/consent language should be used?
- Should participation be limited to specific grades, schools or board-approved settings?

GTESTCANADA
Student Safe Driving Program

Why a Board Might Consider a Pilot

Low operational burden

GTestCanada supplies the school-specific referral pathway; schools can choose their own approved distribution channel.

Student accessibility

Free resources allow students to begin without a purchase.

Clear separation

The program is positioned as an independent preparation resource, not an official licensing authority.

Controlled rollout

A board-selected pilot provides an opportunity to review the service before wider use.

Important Independence Statement

GTestCanada does not represent itself as a Government of Ontario, Ministry of Education, MTO, DriveTest, school-board or government-approved program. Any participation would be subject to the appropriate institutional review and authorization.
